To whom this may concern:

I really don't know where to begin. I took a walk in my neighborhood the other day and just up the street I found the following. (Attached photo's) The next several days I went online to get the number of the house, and I think it is 25 Hemlock St.

I don't know if all this has been there for awhile or just appeared recently. I did notice that this house has been boarded up for some months. During the winter, I guess the snow might have covered up some of this. Some of this looks recent and maybe others are dumping trash and such as well.

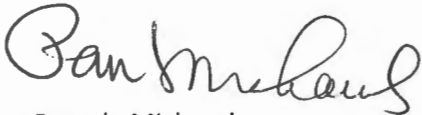

Jim and I have lived at 10 Cherry St. for 35 years. We always keep our property neat and orderly. I don't know if anything can be done to clean this up and I don't know where I should go from here. I don't like the idea that this could develop into an infestation of bugs and rodents.

I can't understand the homes beside and across from this place that would not complain about the dumping of trash. Maybe they have. I know this is an eyesore and I don't what my property affected by this.

Maybe someone could go down when you get the time and check it out.

Thanks for your assistance.

Sincerely,

Pamela Michaud
