---

Hi Chris,

Yes, the new stairs are configured to be tucked against the porch. The stoop to be approx 4x6, the staircase itself works out to between 8.5 and 9 feet in length by approx 4 feet in width.

thanks,

tom

Hi Thomas,

I am in the process of reviewing your permit application to replace the rear staircase and stoop at 460 St John St. I had a question - is the new stairs/stoop a different configuration than the old one? In aerial photos it looked like the old one came straight out and the new one will be tucked against the porch.

Also, can you tell me roughly what the dimensions of the new staircase will be? Scaled from the plan it appears to be about 4' by 8' but I just wanted to confirm.

Thanks,  
Chris
