

**AFFIDAVIT**

**Common Areas and Unit 205  
Nathan Clifford Building  
180 Falmouth Street  
Portland, Maine**

*FIREPRO*<sub>®</sub> Project No.: 4569

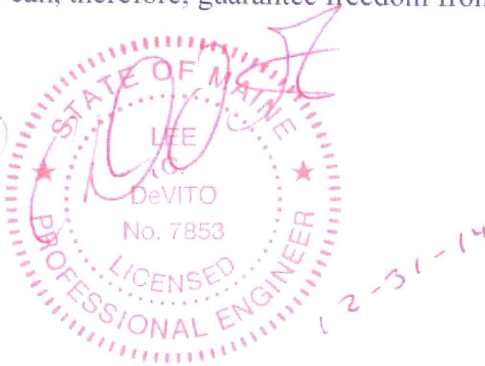

I certify that the fire protection and life safety systems installed in the common areas and Unit 205 in the Nathan Clifford Building located at 180 Falmouth Street in Portland, Maine, to the best of my knowledge, have been installed in accordance with the design documents and are in conformance with the Maine Uniform Building Code and all other pertinent laws, rules, and regulations of the City of Portland, Maine.

*FIREPRO*<sub>®</sub>'s review of the fire and life safety systems during their installation and construction is for the limited purpose of checking for general compliance with the information provided on the permit documents and for general conformance with the requirements of the Maine Uniform Building Code. We do not review or approve any means, methods, or procedures of installation or construction; nor do we review construction safety precautions. Installation in conformance with the construction documents and the nationally recognized standards referenced by the Maine Uniform Building Code is the responsibility of those organizations performing the installation and construction of the fire and life safety systems.

*FIREPRO*<sub>®</sub> Incorporated makes all reasonable efforts to incorporate practical and advanced fire protection concepts into its advice. The extent to which this advice is carried out affects the probability of fire safety. It should be recognized, however, that fire protection is not an exact science. No amount of advice can, therefore, guarantee freedom from either ignition or fire damage.
