□ What class of standpipe is this?

□ Is the system automatic or manual?

 \Box Is the system wet or dry (see NFPA 14:5.4.1.4)?

□ Is the structure high-rise (see NFPA 101:3.3.32.7)? _____

□ What is the minimum residual pressure for the most remote hose connection (see NFPA 14:7.8.1 and 7.8.2)?

□ What is the maximum static pressure at hose connections (see NFPA 14:7.8.3)?

□ Are floor control valve assemblies provided (see NFPA 14:6.3.5)?

□ Number of standpipes (see NFPA 14:3.3.11): _____

□ Minimum required flow rate (see NFPA 14:7.10):

□ Fire department connection- number of 2 ½" inlets (see NFPA 14:7.12.3):

- □ What is the pressure required at the FDC inlets to deliver the system demand (see NFPA 14:6.4.5.2.2):
- □ Is the nearest fire hydrant within 100 ft. of the FDC (see NFPA 14:6.4.5.4)?
- The completed Standpipe Contractor's Material and Test Certificate for Aboveground Piping and Undergrounding Piping as applicable shall be provided at the completion of the job (see NFPA 14:11.1.3): _____

NFPA 20 fire pump check list (not required for NFPA 13D systems)

 \square Is this check list applicable? **NO**

□ What edition of NFPA 20 is the designed to?

□ What is the water source?

□ Is the pump and associated equipment listed for fire service?

□ What is the minimum required flow rate?

□ What is the pump driver type? _____

□ Is the pump design less than 7 hp? _____

□ If less than 7 hp does the pump have a general listing and has its use been approved by the State Fire Marshal's Office?

□ Will the equipment be protected in accordance with NFPA 14:5.12?

□ Is the pump installed at least 50 ft. from the protected premises?

□ If not what is the fire resistance separation provided (see NFPA 14:5.12.1.1)?
