Due to a drainage/run off problem secondary to a larger cement
slab footprint surrounding the existing garage, we would like to
remove the cement slab (extraneous and outside the building) and
replace it with brick patio matching the existing brick patio, and
utilizing the drainage already present. We would like to
replace existing wooden/carpeted back door steps with granite
(similar to other entrances).

We would like to install a motion sensitive light
over the garage door to illuminate the area at night
for safety. style to be determined and an image sent to you

We would like to remove the existing aluminum fence
which is 5' 4" tall and replace it with a
new privacy fence. The new fence would be solid
panel wood 5ft high with a decorative lattice trim (see
description on plan.) The fence would run the same
path of existing fence without damaging the existing
tree between it and the alley. We would replant the
space between the fence and alley with additional plantings.
The fence will be stained to match the trim of the house
and the clapboards of garage.
In addition, a black aluminum gate and fence will be added
to path to the right of house (looking from alley) to
the existing side line fence. It will match current fence
on property and will not be visible from front or back
of the house.
