PERMIT ISSUED  
WITH LETTER

527 Danforth Street

June 17, 1974

cc to: Portland Welding Supply  
527 Danforth Street

George H. Stanford  
191 Spurwink Road  
Scarborough

Dear Mr. Stanford:

Permit to construct an addition on the right side of existing building as per plans is issued herewith subject to the following BOCA International Building Code requirements:

Anchor bolts are required to be spaced not farther apart than 8' o. c's., and at the corners.

The upper right member of the box sill is required to be doubled at the ends of the building.

Please call this office and tell us what size timber or piece of steel you are to use where the lally column is shown in the center of the span.

Very truly yours,

Earle S. Smith  
Plan Examiner

Falmouth, Maine 04105

sketch for putting a roof on storage dock at  
Portland Welding Supply :

Roof covering to be corrugated fiberglass sheeting.

Chain link fencing to be installed on the inside of the walls.

The \$800.00 on the first permit was to build the dock and the roof  
and not the Chain Link fencing, this will add about \$200.00 to the  
cost of the total job.

# APPLICATION FOR AMENDMENT TO PERMIT

Amendment No. 1  
Portland, Maine, Nov. 5, 1971

PERMIT ISSUED

NOV 16 1971

CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, MAINE

The undersigned hereby applies for amendment to Permit No.                      pertaining to the building or structure comprised in the original application in accordance with the Laws of the State of Maine, the Building Code and Zoning Ordinance of the City of Portland, plans and specifications, if any, submitted herewith, and the following specifications:

Portland 772-3746

Loading and Storage  
for Propane Tanks

10 FT. x 30 FT. figured to hold up to 90  
full tanks weighing 115 lbs. each. This makes  
a total live load of 51.8 lbs per square foot  
and a dead load of 5 lbs per sq. ft.

Using a 16 inch center spacing this means  
a total load of 757 lbs per joist allowing  
the use of 2"x8" joists.

The 6"x8" will carry 3781 lbs uniform  
loading. With a 10'0" span the figured load would  
be 2840 lbs.

The 4"x8" will carry 4984 lbs at 5 ft span. With  
the figured load at 1420 lbs this is over sized.

The above figures are taken from Wood  
Structural Design Data. copyright 1957 by the  
National Lumber Manufacturers Association.

**Gentlemen:**

Permit to construct a one-story frame addition 18'x24' on side of existing building at the above named location is being issued subject to plans received with the application and in compliance with Building Code restrictions as follows:

1. If there are ever to be more than 20 people in the entire building at any one time then a rear exit door will be required with exit signs adequate in location to indicate the rear means of egress from the building and all doors involved in a means of egress are required to be equipped with at least a vestibule latchset.
2. Toilet room will need to be vented as required by the Plumbing Inspector.
3. Anchor bolts for the sillie will need to be spaced not more than six feet on centers instead of the eight feet shown on the plans. Anchor bolts will also be required at each corner.
4. The 4-2x10's making up the girder to carry the floor load will need to be at least fir members or graded fir 1500 F.B.I. on an 8-foot span.
5. The rear section which will be for light storage will need to be posted with signs allowing a storage capacity of not over 160 pounds per square foot are to be installed in conspicuous locations.
6. If partitions are to be installed then amendment to this permit will be needed or a permit will need to be applied for at a later date if this work is to be done.

Very truly yours,

Gerald E. Hayberry  
Director
