Dear Ms Machado,

I wish to appeal to the zoning administration, under Section 14-433 (b) (2), the requirement of a 10 foot side setback and request that the proposed 5 ft setback as describe in my submitted plan be approved. Where I have proposed the garage placement is the only workable placement because the slope of the land elsewhere on my property would require a gradient climb so great as to make the garage impossible to be used.

Thank you for your attention to this matter.

David Fenton
