RE: 30,000 Gallon Aboveground Fuel Oil Tank

Dear Tim:

This letter is to inform you that I had spoken to the Senior State Inspector Paul Moody of the Oil & Sold Fuel Board, about the concerns of the size of the 30,000 gallon aboveground fuel oil tank. He informed me that there were no concerns on his part about the size of the fuel oil tank and that he has no issues with its installation and that he was ok with its installation per the design. I am satisfied with his answer to my question of the sized of the tank and I have no concerns about the installation and neither does he.

Please forward this letter to the owners as to our conversations.

If you have any other concerns, please do not hesitate to give me a call.

Sincerely,

Tony Couture
