Chris

On Friday March 9th we (me, Caitlin and Shukria) met with representatives of Mercy and the sign company to discuss the proposed signage for their main hospital building in the context of the Contract Zone requirements that I outlined below.

Based on that discussion the applicant has revised the proposals as attached- it took some while because they needed to work with the EMHS (who were revising fonts and graphics for "branding") and ensure the proposals addressed those requirements as well as ours and the wishes of the donor being "honored" by the signs.

The Planning Division considers that the revised signs (as attached) are acceptable and recommend issuing the sign permit for these. The applicant is anxious to get the permit this week, so please move this forward as quickly as possible.

(I would note that we have advised Mercy that we expect future new signage of this scale on the Mercy site to follow the same graphics/style, and I will follow up on that separately from this permit as its an amendment to the Design Standards).

Thanks

Jean
