RE: 188 Dartmouth St.

On June 30, 1976 a final inspection was made on the new garage at the above location. Everything structural is as per codes. This is just a not to remind you that the loft area is not to be used for an apartment or any other living use as the joist structure was not intended for live loads. It will also be wise not to overload this area with storage.

Very truly yours,

Marge Schmuckal
Building Inspector
