Hi Marge,

Thank you for your note.

Per your request, I've attached the refrigerator cut sheet. Originally, the Owner was considering adding a freezer in the basement. They purchased this refrigerator for their daily use, then decided to go with a different model for their kitchen. It seemed like a natural progression to put this in the basement (rather than a freezer) to use for summer overflow when entertaining. We see this fairly frequently in other summer cottages that we work on. There are absolutely no plans to have the basement area serve as a separate dwelling unit.

If this is an issue, we will tell them that they cannot have it and remove it from the project. Please let me know.

-Margaret

hi Margaret,

I have been reviewing the plans submitted for the alterations at the above location. I do see that there is a new refrigerator downstairs. I am concerned that this basement area is starting to look like a new dwelling unit. Our Land Use Ordinance defines a dwelling unit as having kitchen facilities such as "facilities used for the preparation of meals, including refrigerators and devices used for the cooking and preparation of food". If you have any more information concerning this refrigerator, please get me the information such as a catalogue cut or manufacturer's information. Is this a full size refrigerator or is it like a dorm refrigerator? The more information concerning the area of the refrigerator would be helpful before I approve the permit. Are there any cooking facilities? Are there any sinks? If so, what size.

I had to put your application on hold until I can be satisfied that this basement area is not a separate dwelling unit.

GTZ21GBE GE® ENERGY STAR® 21.0 Cu. Ft. Top-Freezer Refrigerator

Dimensions and Installation Information (in inches)

Overall Dimensions	Height to top of hinge (in.) A	66-3/4
	Height to top of case (in.) B	66
