Re: Shipping Containers/Change of Use

Dear Mr. Russell,

On November 15th, Snapspace Solutions contacted me by email to act as a third party electrical inspector for repurposed shipping containers that will be installed in the City of Portland.

In 1981 I was granted my Master Electrician License and have worked in all phases of residential, commercial, and industrial electricity applications since that time.

For the last 14 years I have been employed by the State of Maine as a State Electrical Inspector. During this time I have gained a vast knowledge of the National Electrical Code working closely with electrical contractors, local code enforcement officers as well as the State of Maine Fire Marshall's Office.

I am highly confident that I can provide inspection services for these containers.

I am free from conflicts of interest with the applicant, owner and others of direct financial interest for the specified project.
