Letter of Intent for 89 Pleasant Ave., PI, BP#2017-01190

This permit application uses Option 2 (partially modified containers, finished at the local site) of the City of Portland Shipping Container Policy for Residential Structures.

The names and types of inspections to be conducted by the TPI inspectors will be as previously specified to the city by the builder, SnapSpace Solutions.

As applicants and owners, we shall furnish general contracting services. SnapSpace Solutions will partially build the structure including electrical and insulation work at their factory, along with all structural work including installation of doors and windows. They will deliver the structure to the site. The general contractor will provide the finished foundation, securing of the structure to the foundation and existing house along with final interior electrical (outlets, switches, fixtures) and finished carpentry. We will also provide the professionals who will wire the electrical panels and install all heating, ventilation, and plumbing fixtures. We have applied for the building permit. We will apply for other permits for electrical and plumbing work done on site as needed. SnapSpace will apply for any permits related to TPI.
