

Proposed Specific Use:

The proposed home occupation for my house at 224 Island Ave. Peaks Island, is for a private duty skilled nursing and rehabilitation service to serve Peaks Island residents. I wish to treat patients in my own home using my skills as a Certified Rehabilitation Registered Nurse (CRRN). This may include complicated wound management and dressing changes, diabetes management teaching, light strength training, massage therapy, and nutritional consultation. I plan to schedule 3 consults daily, a percentage of which may be performed at client's residences depending upon their particular circumstances and needs.
