---

This can be allowed as fast track with the inclusion of details on the connectors and roof mounting.

This also requires an electrical permit as well.

Jeanie, this is another of those that don't fit in one of the categories, but I feel may be fast tracked (maybe). Could you do a quick review? It's a single family; solar install on roof. All documents are attached.  
-Brad.

Good morning,

Attached please find a Building Permit Application, Fast Track Form, Spec Sheet and Plans for Alicia Kershaw. Per our email yesterday, I marked the Fast Track Form with "Special Quick Review" request. Greg Dorsey spoke to someone in your department this morning about what documents are required for this project. If you have any questions or need additional items please let us know.

Thank you,

**Paula E. Junkins**
