

In support of the horse shelters on Peaks Island

Hello,

I am writing in support of allowing the horse structures to remain on Covey Johnson's land on Peaks Island. While I understand that permit processes are required, it would be an altering of the island diversity to remove these shelters and endanger possibility of having the horses on the island. The horse shelters and the horse presence is a part of the year round cutler of the island that requires special considerations.

Thank you,

Gail Trefethern-Kelley, Peaks Island Resident
