re: Locally milled (but not mill graded) roughsawn hemlock framing lumber

TAMMY AND MIKE,

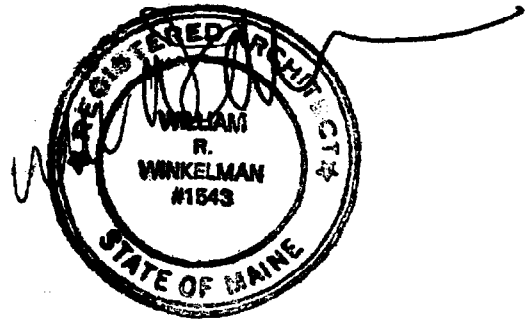

It is my understanding that when locally milled roughsawn hemlock (which is typically not graded) is utilized as structural framing lumber, documentation from a registered architect or engineer is required to satisfy the grading issue.

This letter is such documentation.

The non-graded locally milled roughsawn hemlock structural framing lumber spec'd for this Peaks Island residence will be subject to my inspection and review and will be approved for use by myself only if said lumber is found to satisfy the structural loading configurations and parameters as designed for this structure, and as defined by code.

Please feel free to call with any additional questions.

Thanks, Will
