---

Hi,

Yes, thank you, the permit was originally issued several years ago. The amendment drawings I am sending are follow up to an e-mail exchange between Jeannie and Rob Lieber, my client, back in September of this year. Jeannie said:

*"Regardless if the work has not been abandoned, the design is a substantial change from the approved permit and requires an amendment as I noted on the back of the permit. Per Sec. R106.4 Amended Construction Documents, changes made during the construction that are not in compliance with the approved plans shall be resubmitted for approval as an amended set of construction documents. Please submit this electronically, per the information I provided."*

It was my understanding from her letter that the permit had not expired, but just needed some updated information. This is my first time submitting a permit amendment electronically, so please let me know if you need more information, or if I should take a different approach.

Thank you, Have a great Thanksgiving.

Rachel, what permit are you referring to when you state this is an "amendment?" The only ones I see in our system are ones issued several years ago, with no updates of inspections and therefore have already expired.

Please find attached the Lieber Drawings renamed according to your most recent request. Please let me know if you have any other questions.

Thank you, Rachel

Rachel, please re-name your documents accordingly; For instance:

You named:

**A1 Lieber First and Second Revision 8.1.12**

Appropriate Name:

**A1 Proposed 1st & 2nd floor plan**

(doesn't need "revision" or date, follow the name/plan name)

There is no "revision" this is the first time we are getting this.

Please remember, the forms need to be *named what they are*.

Good Morning Brad,

Please find attached a permit addendum application for 41 Bayberry Lane on Peaks Island. As per previous conversations between my client, Rob Lieber, and Jeanie Bourke (see e-mail correspondence below), I am sending revised drawings and supporting documents to note changes to the original permit document.

Please let me know if you need any further information, or if you have any questions. Also, please note that the footprint is unchanged. The revisions address framing and foundation technique changes.

Thank you, Rachel

Good Morning Rob,

Just to clarify, the inspection time frame that Don mentioned is due to the foundation being a frost wall, not a basement, therefore no backfill inspection was required.

Regardless if the work has not been abandoned, the design is a substantial change from the approved permit and requires an amendment as I noted on the back of the permit. Per Sec. R106.4 Amended Construction Documents, changes made during the construction that are not in compliance with the approved plans shall be resubmitted for

approval as an amended set of construction documents. Please submit this electronically, per the information I provided.

Regarding the septic system, please schedule inspections as outlined on the approved permit by calling 874-8703 or emailing [buildinginspections@portlandmaine.gov](mailto:buildinginspections@portlandmaine.gov):

1. At scarification to verify removal of vegetation, etc.,
2. At the exposed septic field and tank installation,
3. At backfill for soil stabilization, slopes and extensions

Thanks,  
Jeanie

Hi Jeane,

At my last inspection I remember Don telling me that he did not need to see me until the framing construction and it was my understanding I just need to submit those technical changes to you.

I am a one man operation and do have a two other jobs, most evenings and weekends have been dedicated towards this project.

Would it be possible to scheduling an inspection to show the progress I've made, I have been working with out a six month break?

I am actually due to have my septic and leach field areas which is are prepped.

Thank you  
All best Rob
