

- Notes:
1. If Frost wall goes to over 4' a third row of #4 rebar will need to be added
  2. When frost walls have to be on ledge then they will need to be pinned and epoxied into the ledge using a #6 rebar 24" long with 12" embedded into the ledge. Spaced a 24" OC.
  3. When footing need to be pinned, use #6 rebar 16" with 8" embedded and epoxied into the ledge.
