---

Laurie,

Thank you for completing the building permit for Marjorie Shaw on Little Diamond Island.

I just put a call into the office regarding a slight change proposed by the architect and structural engineer. Given the large array of precast piers and the challenges of the ledge condition we are likely to encounter, I have attached a modification to the foundation only. This is a stamped engineer plan to go with a frost wall pinned to ledge as opposed to the piers.

Could you review and give me some direction on whether you can modify the existing building permit by amendment so that we can proceed as planned by June 1?

I thank you advance for taking a look at seeing if we can swap one for the other all other things equal.

Regards,

Lee Proscia
