Maine Division of Parks and Public Lands: Jewell Island Trail Rehab. Rex Turner 287-4920, rex.turner@maine.gov

The Maine Division of Parks and Public Lands will be supervising a trail team from the Maine Conservation Corps to reconstruct stone steps, install rock or wood waterbars and several small timber steps, construct a rustic plank bridge, and build a small timber staircase. There may be limited ditching of a short trail segment, though overall ground disturbance will be very limited. Work will be performed by a three-person team with hand tools. Specific work is listed in the table below. Sample photographs are included as well as an attached map of the project.
