Hello Ann,

On another note:

I find it amazing that our new neighbors (81/77 Church Rd, Cliff Island) received their building permit, in short order, as there has been additional clearing of sumac on the frontal coast, a dumpster being filled with construction debris (gutting of the internal structure), and roof work being done on adjacent garage building structure. I am curious how this was accomplished, being that it has taken us over 7 months to almost nearly accomplish a demolition permit?

Sincerely,  
Elfriede Walden
