Subject: Septic System - 188 Sunset Road

Hi Brad,

Under "Type of Application" on the HHE-200 form, I neglected to fill in this box, but it is not clear which item should be checked since this is currently an overboard discharge system and it will remain an overboard system with the exception of the addition of an OxyPro pretreatment tank between the septic tank and the chlorinator. The use of the building or number of bedrooms will not change. I can fill in "Replacement System" if you would like even though nothing is being replaced. The problem is that the form is being used to fulfill a DEP regulation and the Maine Plumbing Code does not deal with overboard discharge.
