Matt,

See below from our Park Manager. He has approved the plan with the added restrictions around fixing the grass and that the City will not be responsible in the future for installing any fencing.

Visited this site today. I am not concerned about the few extra parking spots that they Incorporated, but there is some moderate erosion occurring at the edge of the pavement that should be repaired.

Also, I don't think we should ever be responsible for installing a fence at the edge of the ball field that they have chosen to park cars next to. If the tenant is concerned about cars getting hit, they should install the fence themselves.

Thanks,
Ethan

FYI. Can you make sure this didn't impact us negatively?
