Good morning, I am reviewing the demolition permit application and have the following questions regarding the project:

1. Does the shed sit on a concrete slab and/or foundation? If so, will that be removed? **It sits on the ground**
2. What is the condition of the surface that will be exposed at the wall to remain currently inside the shed, and how will it be addressed for weather tightness/thermal efficiency? **It's in good condition, just needs a new coat of paint**
3. What is the proposed grading at the removed shed, e.g. loam & seed, asphalt, hardscape? **Loam and seed**

Please contact me if you have any questions, thanks

Regards
