APPLICATION FOR PERMIT FOR
HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, March 13, 1961

PERMIT ISSUED

MAR 13 1961

CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location **313 Deering Avenue** Use of Building **single family** No. Stories **2** New Building
Name and address of owner of appliance **Edward Sacknoff - same** Existing
Installer's name and address **H. J. Katz - 173 Neal St.** Telephone

General Description of Work

To install **forced hot water boiler & burner system - replacement**

IF HEATER, OR POWER BOILER

Location of appliance **basement** Any burnable material in floor surface or beneath **no**
If so, how protected? Kind of fuel? **# 2 fuel oil**
Minimum distance to burnable material, from top of appliance or casing top of furnace
From top of smoke pipe From front of appliance From sides or back of appliance
Size of chimney flue **8 in** Other connections to same flue **none**
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion? **yes**

IF OIL BURNER

Name and type of burner **Burnham - gun** Labelled by underwriters' laboratories? **yes**
Will operator be always in attendance? **no** Does oil supply line feed from top or bottom of tank? **bottom**
Type of floor beneath burner **concrete** Size of vent pipe **1 1/4**
Location of oil storage **basement** Number and capacity of tanks **1-275 gal**
Low water shut off **yes** Make **McDonald Miller** No.
Will all tanks be more than five feet from any flame? **yes** How many tanks enclosed? **none**
Total capacity of any existing storage tanks for furnace burners **275 gal.**

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Amount of fee enclosed? **5.00**
cost of work **2,000 10.00**
APPROVED: 15.00

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed?

Memorandum from Department of Building Inspection, Portland, Maine

313 Deering Avenue - Amendment #1 to Permit 52/715 to construct roof
over new piazza, for E. D. Sacknoff
by King Rutland

June 23, 1952

Amendment #1 to Permit 52/715 covering construction of roof over existing first
floor platform is issued herewith subject to the following:-

- 1 - Pitch of shed roof is to be greater than 4" in 12" if only 4½" to 5" in 12".
- 2 - The 2x6 roof joists are to be supported on the 4x10 beam recently installed
beneath the outside edge of the existing two story porch at the second floor
level by resting on less than a 2x3 nailing strip securely fastened to the
4x10.

c.c. E. D. Sacknoff
313 Deering Avenue

AJS/G

(Signed) Warren McDonald
Inspector of Buildings

AP 313 Deering Avenue

May 19, 1952

Mr. Edward J. Sacknoff
313 Deering Avenue
Mr. King Rutland
206 Franklin Street

P. S. Contractor says that there is already a 6x8 under the outside face of the second floor, and he proposes to supply another 6x8 beneath it, well supported at each end. This will meet the needs.

Gentlemen:

Rather than prolong the negotiations about this porch job at 313 Deering Avenue any longer, after telephoning Mr. Sacknoff and finding that Mr. Rutland is to be the contractor instead of Robert Miles, the building permit is issued herewith subject to the conditions which follow. The big question hinges around how the second floor and the roof of the existing piazza are framed, in view of the fact that the owner desires to take out the center post which now holds at least the roof and, perhaps, a part of the second floor of the present porch. If this letter is not understood, or if you are unwilling or unable to comply with it, it is important that you do not start the work and that you contact this office with an explanation as soon as possible.

1. In all probability the roof joists of the existing piazza run out from the rear wall of the dwelling toward the rear yard, so that the portion of post to be removed must be supporting about half of the total weight of the roof and any snow that might come upon it. The question is as to which way the floor joists of the second floor of the existing piazza run, whether the 14' way of the piazza or the 5' way out toward the rear yard. If these second floor joists run the 5' way, or, if they run the 14' way and are supported beneath their centers by some type of beam which gets its support under one end on this post now to be removed, the new beam under second floor to make up for the removal of the post will have to be either 4x10 or 6x8 in either case Douglas Fir, not Hemlock.

If the second floor joists of the existing piazza run the 14' way and are not supported beneath their centers then a 4x8 Hemlock will meet the needs on the 14' span.

In any case this beam may be called upon to carry a very substantial load and care will be necessary to support it on both ends down to the present foundation.

The latest sketch indicates that the joists of the new platform are proposed to be 2x6, running the 14' way of the extension. This is strong enough, irrespective of the fact that the existing porch is framed the same way. Either use 2x8 joists, not more than 16" apart, on the 14' span, in which no less than 1x3 bridging is used at the center of the span; or use the 2x6s, but run a beam at their centers to be supported on the new center pier and on the foundation of existing piazza.

Very truly yours,

WCD/S

Warren McDonald
Inspector of Buildings

AP 313 Deering Avenue

May 13, 1952

Mr. F. D. Sacknoff
313 Deering Ave.,
Mr. Robert Miles
152 Washington Ave.,

Gentlemen:

The rough sketch filed with Mr. Sacknoff's application for a permit to construct a one story, 7'x14', platform at the rear of the existing rear piazza at 313 Deering Avenue, does not contain enough information so that we can be assured of compliance with the Building Code, as we are required to do before any permit is issued.

The biggest point in question is to how you are to support the roof and, perhaps, the second floor of the existing piazza if you remove the intermediate post as the sketch indicates. The sketch says to put in a 4x8 brace in place of the post, but this is not understood. If a 4x8 beam is meant under the second floor to replace the post, it would not be very strong on a 14' span. You will have to find some way to put down on paper, without the necessity of a verbal explanation in here just how this second floor and roof of the existing piazza will be supported.

You will also have to indicate the directions which the new 2x6 floor joists are to take, whether running the seven foot way of the added platform or the fourteen foot way. If the latter, a beam under their centers will certainly be needed to make it a seven foot span and we should have to know the size proposed for this beam.

It will also be necessary to show the size of the sill under the outside of the existing piazza and which way the floor joists of the first floor of existing piazza run--this so that we can check up on the strength of this sill which may have to bear a considerable part of the load of the new floor.

The application states that the new floor joists are to be 24" from center to center. These are not permitted to be more than 18" from center to center.

Also show that the concrete piers will extend at least 6" above the surface of the ground and that the woodwork from the rest of them will be anchored to the piers by means of metal dowels or equivalent.

It is not lawful to start this work in any manner until you have the permit card in your possession and posted upon the premises.

Very truly yours,

WMcD/B

Warren McDonald
