Dear Portland Codes,

Attached is the framing diagram for the new glass block window. It comes set up in a vinyl frame from Portland Glass.

There presently is a window in that outside wall of the bathroom. We are removing that window, and leaving the header where it is, and raising the sill to make the opening shorter.

If we find the header inadequate, we will replace with the 2x8 header as specified in the drawing.

We are not changing any other framing.

Please let me know if there is anything else necessary to get this entered.

Thanks,

Gerald Muto
