RE: Scope of Work MMC Wound Care

Favreau Electric will be installing new addressable devices for the Wound Care tenant space located on the ground floor of MMC Brighton Campus. The new devices will be added to the existing Notifier addressable fire alarm system (with voice evac).

The tenant space is fully sprinkled. The existing panel is located in the basement (in engineering). There is a remote annunciator and remote mic at the main entrance of the building. There is an existing radio master box on site.

Norris Inc. will provide the fire alarm equipment, submittal documents, fire alarm permits, and final connections and testing per City of Portland requirements.
