THIS CARD MUST BE POSTED ON THE STREET SIDE OF THE PROPERTY
PENALTY FOR REMOVING THIS CARD

BUILDING PERMIT INSPECTION PROCEDURES

Please call 874-8703 or 874-8693 (ONLY)

or email: buildinginspections@portlandmaine.gov

With the issuance of this permit, the owner, builder or their designee is required to provide adequate notice to the city of Portland Inspections Services for the following inspections. Appointments must be requested 48 to 72 hours in advance of the required inspection. The inspection date will need to be confirmed by this office.

- **Please read the conditions of approval that is attached to this permit!! Contact this office if you have any questions.**
 - **Permits expire in 6 months. If the project is not started or ceases for 6 months.**
 - **If the inspection requirements are not followed as stated below additional fees may be incurred due to the issuance of a "Stop Work Order" and subsequent release to continue.**
1. Setbacks: Pool Location
 2. Close-In: Electrical- Permit Required
 3. Final Inspection

The project cannot move to the next phase prior to the required inspection and approval to continue, REGARDLESS OF THE NOTICE OF CIRCUMSTANCES.

IF THE PERMIT REQUIRES A CERTIFICATE OF OCCUPANCY, IT MUST BE PAID FOR AND ISSUED TO THE OWNER OR DESIGNEE BEFORE THE SPACE MAY BE OCCUPIED.

Winter Closing Kit

GENERAL INFORMATION:

Confer A-Frame Eliminator Safety Ladder with Barrier

This A-Frame Eliminator Safety Ladder is easy to install and offers safety and piece of mind. With the swimming barrier and an outside lock to inhibit unauthorized entry to the pool, you can rest assured that your pool will be a safe place to swim.

STANDARD FEATURES:

- Fits 48" to 54" aboveground pools
- Adjustability is made by simply moving side braces up or down depending on pool height
- Heavy duty construction
- Five evenly spaced steps make climbing the ladder easier
- Outer steps swing up and lock into upright position
- Some building inspectors now require this instead of a lift-off ladder section
- No sand required; just fill with water to prevent floating. Most other ladders use a bag filled with sand
- Two tone color: white and grey: Complements today's pools
- Safety first: Ladder now comes complete with a padlock for added safety benefit
- Features an anti-entrapment barrier
- Weight guideline: 300 lbs.

material.

(f) Demolition debris includes, but is not limited to, materials which are created by site preparation, clearing land, or erection of a structure. It also includes, but is not limited to, brush, tree limbs, stumpage, building materials, and the waste products of building activity, such as: clay, brick, masonry, concrete, plaster, glass, wood and wood products, asphalt, rubber, metal; and plumbing, electrical and heating fixtures, appurtenances thereto and parts thereof.

(g) No demolition debris shall either be disposed of or stored on any of the islands.

(Ord. No. 76-10/11, 11-15-10)

Sec. 6-24. Swimming Pools, spas and hot tubs.

(a) Definitions.

1. *Barrier* shall mean a fence, wall, building wall or combination thereof which completely surrounds the swimming pool and obstructs access to the swimming pool.
2. *Swimming Pool* shall mean any structure intended for swimming or recreational bathing that contains water over 24 inches (610 mm) deep. This includes in-ground, aboveground and on-ground swimming pools, hot tubs and spas.

(b) An outdoor swimming pool, including an in-ground, aboveground or on-ground pool, hot tub or spa shall be provided with a barrier which shall comply with the following:

1. The top of the barrier shall be at least 48 inches (1219 mm) above grade measured on the side of the barrier which faces away from the swimming pool. The maximum vertical clearance between grade and the bottom of the barrier shall be 2 inches (51 mm) measured on the side of the barrier which faces away from the swimming pool. Where the top of the pool structure is above grade, such as an aboveground pool, the barrier may be at ground level, such as the pool structure, or mounted on

- top of the pool structure. Where the barrier is mounted on top of the pool structure, the maximum vertical clearance between the top of the pool structure and the bottom of the barrier shall be 4 inches (102 mm).
2. Openings in the barrier shall not allow passage of a 4-inch-diameter (102 mm) sphere.
 3. Solid barriers which do not have openings, such as masonry or stone wall, shall not contain indentations or protrusions except for normal construction tolerances and tooled masonry joints.
 4. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is less than 45 inches (1143 mm), the horizontal members shall be located on the swimming pool side of the fence. Spacing between vertical members shall not exceed 1.75 inches (44 mm) in width. Where there are decorative cutouts within vertical members, spacing within the cutouts shall not exceed 1.75 inches (44 mm) in width.
 5. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is 45 inches (1143 mm) or more, spacing between vertical members shall not exceed 4 inches (102 mm). Where there are decorative cutouts within vertical members, spacing within the cutouts shall not exceed 1.75 inches (44 mm) in width.
 6. Maximum mesh size for chain link fences shall be a 2.25-inch (57 mm) square unless the fence is provided with slats fastened at the top or the bottom which reduce the openings to not more than 1.75 inches (44 mm).
 7. Where the barrier is composed of diagonal members, such as a lattice fence, the maximum opening formed by the diagonal members shall not be more than 1.75 inches (44 mm).
 8. Access gates shall comply with the above standards and shall be equipped to accommodate a locking device. Pedestrian access gates shall open outward

away from the pool and shall be self-closing and have a self-latching device. Gates other than pedestrian access gates shall have a self-latching device. Where the release mechanism of the self-latching device is located less than 54 inches (1372 mm) from the bottom of the gate, the release mechanism and openings shall comply with the following:

- 8.1. The release mechanism shall be located on the pool side of the gate at least 3 inches (76 mm) below the top of the gate, and
 - 8.2. The gate and barrier shall have no opening greater than 0.5 inch (12.7 mm) within 18 inches (457 mm) of the release mechanism.
9. Where a wall of a dwelling serves as part of the barrier one of the following conditions shall be met:
- 9.1. The pool shall be equipped with a powered safety cover in compliance with accepted industry safety standards; or
 - 9.2. All doors with direct access to the pool through that wall shall be equipped with an alarm which produces an audible warning when the door and its screen, if present, are opened. The alarm shall sound continuously for a minimum of 30 seconds immediately after the door is opened and be capable of being heard throughout the house during normal house-hold activities. The alarm shall automatically reset under all conditions. The alarm system shall be equipped with a manual means, such as touchpad or switch, to temporarily deactivate the alarm for a single opening. Such deactivation shall last for not more than 15 seconds. The deactivation switch(es) shall be located at least 54 inches (1372 mm) above the threshold of the door; or
 - 9.3. Other means of protection, such as self-closing doors with self-latching devices, which are approved by the building authority,

shall be acceptable so long as the degree of protection afforded is not less than the protection afforded by section 9.1 or 9.2 above.

10. Where an aboveground pool structure is used as a barrier or where the barrier is mounted on top of the pool structure, and the means of access is a ladder or steps, then:

10.1 The ladder or steps shall be capable of being secured, locked or removed to prevent access, or

10.2 The ladder or steps shall be surrounded by a barrier which meets the requirements set forth above. When the ladder or steps are secured, locked or removed, any opening created shall not allow the passage of a 4-inch-diameter (102 mm) sphere.

11. Barriers shall be located so as to prohibit permanent structures, equipment or similar objects from being used to climb the barriers.

(c) Spas or hot tubs with a safety cover which complies with accepted industry safety standards shall be exempt from the provisions of this section.

(Ord. No. 76-10/11, 11-15-10)

Sec. 6-25. Municipal plumbing inspection and permit fees.

In addition to all other fees hereunder or under any state law, the city shall charge a ten-dollar (\$10.00) base fee for plumbing inspections and the following fees for plumbing permits:

(a) *Internal plumbing code fees:*

Fixture fee:

1-3 Fixtures:	\$24.00
Each additional:	\$6.00

Reinspection fee: Twenty dollars (\$20.00). A reinspection fee shall be charged when a reinspection is required as a result of improper or incomplete work.
