Dear Nate and Rachel,

This fall we are planning on taking down our garage and rebuilding it in place. We have asbestos shingles under the vinyl siding and this will be removed by a certified abatement company the week of September 11th. Demo and new construction of the garage will follow soon after. We will work to keep the time, mess, and noise to a minimum!

If you agree that you have been informed and have no problem with the work going forward, please sign below and pop this back in my box. This is part of the permitting process. I appreciate your help

Thank you!

Clara Porter
