276 Woodford Street

Proposed expansion

We have recently been offered the opportunity to rent the adjacent room/retail space next to our existing sandwich shop. We would like expand our dining area and add a small pre built service bar (picture included). There is existing doorway/ passthrough connecting the spaces. So there will be no building of walls, doorways or partitions to take place. No plumbing additions or alterations will be taking place.

Our existing space as well as the proposed space are equipped with hardwired carbon, smoke and fire detection units as well as fire extinguishers in each room. All of our fire detection units and extinguishers are inspected and monitored by Cintas™.
