Re: Desiree Scott

To Whom it may concern:

Desiree Scott is a patient at PCHC.

She has a history of asthma and is unable to have chemical treatments for bed bugs applied in her apartment. The chemical treatments used in the past have caused asthma exacerbations making it difficult for her to breathe. It is expected that other chemical treatments for bed bugs will also make breathing difficult for her. Therefore, she will need a treatment for her apartment that does not include chemicals.
