WARNING !!!

THIS BUILDING PERMIT IS ISSUED
SUBJECT TO SPECIAL CONDITION:

THAT NO CONCRETE SHALL BE POURED IN FOUNDATION FORMS AND NO LAYING OF UNIT MASONRY IN FOUNDATION WALLS SHALL BE STARTED UNTIL NOTICE HAS BEEN GIVEN AT THE DEPARTMENT OF BUILDING INSPECTION OF READINESS TO START ACTUAL MASONRY WORK, AND UNTIL RE-CHECK OF LOCATION HAS BEEN MADE BY INSPECTOR.

* * *

Original markings of corners of lot and especially stakes on street line set by Dept. of Public Works must be kept intact and easily accessible for re-check--not covered by excavated earth or building materials. Otherwise the "go-ahead" cannot be given. Dept. of Public Works cannot re-set their stakes.

* * *

Obviously the notice for re-check must be given at such a time as to allow reasonable opportunity to make re-check.

Dear Mr. Mitchell:

The permit for construction of one family dwelling 24' x 30' at 184-188 Coyle Street is issued herewith based on the plans filed with the application and subject to the following:

1. It is understood that the steps from the side platform on your existing dwelling which project over onto the new lot being set off are to be removed and rebuilt so as to run towards the street. The permit is issued on the basis that this will be done.
2. While the plan indicates that the girder is to be 6x12, the application calls for a 6x8. The latter size timber is all right to use only if it is of full size, not dressed, lumber.
3. Since the foundation wall is to be constructed of 12" concrete blocks, a concrete footing at least 8" deep is required on which to start the block wall.
4. It should be noted that 2x8 rafters spaced 16" on centers are specified for the roof of the dormer. These are necessary because of the flat pitch of the dormer roof. Because the 16" spacing of dormer rafters will vary from the 24" spacing of the rafters on the front side of the roof, the ridge piece should be 2" thick instead of the one inch board usually used.
5. There are two times during the construction of the building when notification for inspections by this department are required. The first of these occurs after all framing and firestopping has been completed and the electric wiring and plumbing has been installed and approved by the proper inspectors, but before any lath or wallboard is applied to walls, partitions or ceilings. If everything is found in order at this time, authorization to "close-in" the building will be given on a green tag left at the job. The second notification should be given when all essential work on the building has been completed and before it is used for living quarters. The certificate of occupancy, without which use of the building is unlawful, will be issued at this time if everything is found in accordance with law.
6. While the application calls for the use of a 4x6 sill, the plan indicates a built-up or box type sill. If the floor timbers are to be framed on the sill with the wall studs resting on top of them on a shoe as shown on the plans, the bottom member whether it be 2" or 4" thick is to be bolted to the concrete block foundation wall at the corners and intervals of not over 6'.

Very truly yours,

Warren McDonald
Inspector of Buildings
