RE: 33-35 Clifton St – Fire Damage Repairs

T A Napolitano pulled a permit for repairs at 33-35 Clifton St Portland ME. Repairs consisted of replacing the outside meter enclosure, SEU cable, riser, old load wires to panel and provided the necessary grounding. 1st floor devices were checked for water damage from fire and replaced as needed. 1st floor light fixture wiring was checked and no water damage was found, however we did find the lights are on knob and tube wiring.

Sincerely

Timothy A Napolitano
