Subject: RE: 509 Forest Ave - HopeGateway

Hello Ben,

I have reviewed the drawings and based on "NFPA 13, 2010, A.5.2" this use will be a "light hazard" usage which will meet the fire protection the existing sprinkler system provides. However I do suggest an inspection of the space to verify proper coverage throughout.

Hi Jerry,

Attached are the proposed plans. Note I have listed the SF of the proposed internal uses in a table on the bottom.

Please provide me with a statement as to whether any modifications to the sprinkler or fire alarm system would be required for this change of use.

Thanks for your help.

Ben
