Re: Harrisburg Residence  
1 Hershey St. Portland  
Building Permit #970995

Dear Sam:

This is an application for an ammendment to the existing building permit on this residence.

Attached to this letter is a sketch of a revision of the framing of the area above the garage on this project. Because of the complexities of cutting into the existing roof, the contractor opted to remove the entire garage roof and re-frame it so that it could be supported in a more normal manner on the exterior walls.

As seen from the sketch, this means we are construction more wall area but less roodf area, and it allows more of the under-roof area to be utilized as room and storage space.

The contractor did not give the owner an extra for this work. he said it would be a wash, costwize.

Thank you.

A handwritten signature in black ink, appearing to read 'William Nemmers'. The signature is written in a cursive, somewhat stylized script.
