Seth -

Just following up on our telephone conversation. The new garage will be 22' x 22' with a gable roof instead of a hip roof and the ridge will be lower than the existing garage with the hip roof. . The new garage will be built in the same location as the old garage - 13.5' from the rear property line and how far exactly from the left side property line?

Please confirm this in a return email and include the exact distance of the existing garage from the left side property line.

Feel free to contact me with any questions.

Thank you.

Ann

Hi Ann, thanks for the call and the email. All is correct regarding the new dimensions.

My measurements have the existing garage less than a foot from the left-side property line. My plan is to rebuild at approximately one foot from the left-side property line.
