I have lived here for 5 years and have dealt with bed bugs, cockroaches and not having a stove for 8 months last summer until I treated to call a lawyer or use my rent money did I finally get a stove/oven I have 3 kids who are getting bitten he won't hire a proper pest company

My kitchen ceiling is ripped open with mold exposed and Mohamad won't fix it.

When I moved in Stamel Kargar told me they used to have a problem with pests but it was taken care off and done with.

My first night here I was bitten over 100 times. along with my family.

~~apparently~~

Last summer the window in the second floor hallway fell on my daughter and she needed 6 stitches

There have been many more problems over the years but these are the ones that stand out the most

Thank-you
