**Subject:** Fire Inspection 389 Stevens Ave. Portland ME

Dear Ben,

I recently spoke to you on the phone about my compliance with the inspection of my building located at 383-389 Stevens Ave. ( that is the official address of the entire building). The building consists of one three bedroom apartment on the second floor and Lanes Driving School and my business (Rhonda Farnham Photography) on the first floor.

I was able to do everything asked of me on time except for one thing. I was asked to put a metal door on the cellar entrance from my photography shop. I contacted a professional who installs fire door for a living named Randy who was recommended to me by a Portland Firefighter. Randy's company can not get to my building right away. He said he should be able to do it within six months and that he would put me on a list of people who he may be able to get to sooner. I am hoping that this will be acceptable. I really don't know anyone else that does this type of work and I am not able to intall this door myself.

Thank-you.

Sincerely,

Rhonda Farnham ...cell 207-831-1717
