--	---

Dept: Zoning **Status:** Approved with Conditions **Reviewer:** Marge Schmuckal **Approval Date:** 04/09/2008
Note: **Ok to Issue:**

2) Please note that this lot is legally nonconforming as to minimum lot size and lot area per dwelling unit. Without a site plan I can only assume that this building may be legally nonconforming as to some setbacks and perhaps maximum lot coverage.

With the demolition of this building, the owner has a very limited time to rebuild using the existing legal nonconforming dimensional requirements. The owner only has one (1) year from the actual date of demolition in which to rebuild. IT IS THE OWNER'S RESPONSIBILITY TO CONTACT THE CODE ENFORCEMENT OFFICER TO NOTIFY THE CITY AS TO THE ACTUAL DATE OF DEMOLITION. If a subsequent permit to rebuild (including site plan review approvals) has not been obtained and significant work has not begun within the one year's demolition, the owner will have extinguished all legal rights to rebuilding using the existing legal nonconformities.

3) This permit is being approved on the basis of plans submitted. Any deviations shall require a separate approval before starting that work.

Dept: Building **Status:** Approved with Conditions **Reviewer:** Tammy Munson **Approval Date:** 04/14/2008
Note: **Ok to Issue:**

1) All demolition debris must be removed from the site.

2) Construction activity was not applied for or reviewed as a part of this permit. This permit authorizes demolition of the structure.

Demolition of a Structure Permit Application

If you or the property owner owes real estate or personal property taxes or user charges on any property within the City, payment arrangements must be made before permits of any kind are accepted.

Location/Address of Construction: 3 MATHEWS STREET

Building Demolition Notification Form (BDNF)

Important Notice: Maine law requires the filing of this "Building Demolition Notification Form" prior to demolition of any building except a single-family home

1) Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition. This notification is not required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also not required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. *Demolition* means the tearing down or intentional burning of a building or part of a building.

2) Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building. An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1980 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector. If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.

3) Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the *Maine Asbestos Management Regulations* by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check www.state.me.us/dep/rwm/asbestos/index.htm for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that municipalities have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-7826. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

Were asbestos-containing materials found? yes no no inspection or survey required (post-1980 2-4 unit)

To whom it may concern;

We purchased 3 Matthews Street in January and are scheduled to demolish the damaged structure in the near future in preparation for a new two family home.

Please contact Larry at (207) 752-0091 should you have any questions or concerns.

Sincerely,

Louis A. Laurent

The following information is to be considered as the design plan for the specific project that is being worked on.

All work will be done in accordance with OSHA & Maine DEP Chapter 425 rules and regulations

Scope of work:

- 100 LnFt of Thermal System Insulation
- SqFt of FT/Mastic/Carpet/Lino
- Ceiling Removal
- SqFt of Boiler/Breeching
- Whole Component Removal?
- Other: Specify:

Project Design Information:

- ✓ Mobilize Site
- ✓ Erect "Caution " & "Keep out" Signage to regulate staging area
- ✓ Pre-Clean Work Area
- ✓ Install 1 layer Critical Barrier over all openings
- Construct 2-Layer poly Containment
- Construct 1-Layer poly Containment
- Erect "Danger Asbestos" tape to regulate work area
- ✓ Construct 3-Stage Worker Decon
- ✓ Establish Reduced Airflow in containment
- Construct Remote Decon Unit

Electrical:

- Use Existing power supply
- Use Power panel board
- Electrician will install power
- Use Roto-Phase

Worker Protection:

- ✓ Use Protective Suits
- ✓ Use Proper respirator
- ✓ Use Proper Footwear

Removal Procedures:

- ✓ Properly Wet Material being removed
- ✓ Use leak tight containers for waste
- ✓ Fine Clean Work Area
- ✓ Visual Inspection of Work Area
- Wash Floors with TSP
- Run (2) Air Samples & Take to closest lab
- Air Samples Via Independent –
- ✓ Demobilize Work Area

20. Emergency Notification (oral notification must be made within 1 working day of the emergency)

Complete when a waiver to the standard notification period is requested for an emergency asbestos removal project which is necessitated by a sudden, unexpected event such as non-routine failures of equipment or by actions of fire and emergency medical personnel pursuant to duties within their official capacities. Written emergency notification must be received by the Department as soon as possible, but no later than 72 hours after the emergency.

Detailed Explanation (Include the date and hour on which the emergency occurred) _____

MEDEP Action on Emergency Notification

APPROVED DISAPPROVED (by) _____ (date) _____

21. Notification Waiver Request (must be received by MEDEP at least 24 hours prior to the start of the project)

Complete when a waiver to the standard notification period is requested when reasonable planning & foresight could not have predicted the event & other notification procedures would not suffice to protect public health & the environment. Examples include discovering additional asbestos-containing material during a renovation or demolition for which an asbestos inspection was conducted (e.g., within a wall cavity or plumbing chase), a public health threat exists or will develop (e.g. clean up following a fiber release episode), or unforeseeable circumstance (e.g., boiler & associated piping/valves failure).

Detailed Explanation The building was involved in a fire and is structurally unsafe. The city wants the building torn down as soon as the asbestos has been removed.

Standard Variance(s) Requested by Maine Certified Asbestos Design Consultant

Check all that apply. Written Department approval is not required prior to implementation. Standard variances submitted during or before the project due to unforeseeable conditions shall not be implemented until 5 days after the variance is received by the Department unless otherwise approved by the Department.

1. Wetting ACM (during removal phase only) is not required when:

Temperature inside regulated area below 32°F & heating not feasible nor practical

Electrical conditions exist that would create shock/electrocution hazard

Operational high-pressure steam lines are being abated/repaired

2. Exhausting to Ambient Air is not feasible when:

Distance too great Health & Safety concerns (limited egress)

3. Aggressive Air Clearances in dirt crawl spaces only are not required when:

Dirty or dusty conditions exist not related to asbestos activities exist inside or outside the regulated area and will likely result in count overloads (Static Air Samples are required)

4. Containment and air clearances not necessary when:

Enclosure activities do not impact ACM

Removal of TSI components that utilize "wrap & cut" methods, provided that an Asbestos Inspector has determined the components to be in good condition & not likely to release fibers during removal, & has recorded this determination in the project design. By signing below, the Design Consultant attests that the TSI is in good condition.

Removal or repair of ACM using multiple non-contiguous Glovebags that are no larger than 60 inches by 60 inches

Removal or repair, using contiguous Glovebags, that involve a total of no more than 30 1/ft of ACM on a single pipeline, or any amount of ACM that can be removed within 10 Glovebags for pipelines running parallel to each other

5. Remote decontamination unit is needed:

Explain: _____

6. Smaller than standard decontamination unit needed in residential structure:

A variance to the requirements for minimum decontamination unit size is allowed in residential structures where construction of a decontamination unit meeting minimum size requirements is not possible due to room size and configuration, HVAC system component locations, or restriction of safe egress for residents.

Note: A detailed floor plan showing the work area, decontamination unit n and room dimensions must be submitted with the requested variance.

N**

Page 3 of 6

2004 Revision

20. Emergency Notification (oral notification must be made within 1 working day of the emergency)

Complete when a waiver to the standard notification period is requested for an emergency asbestos removal project which is necessitated by a sudden, unexpected event such as non-routine failures of equipment or by actions of fire and emergency medical personnel pursuant to duties within their official capacities. Written emergency notification must be received by the Department as soon as possible, but no later than 72 hours after the emergency.

Detailed Explanation (include the date and hour on which the emergency occurred):

21. Notification Waiver Request (must be received by MEDEP at least 24 hours prior to the start of the project)

Complete when a waiver to the standard notification period is requested when reasonable planning & foresight could not have predicted the event & other notification procedures would not suffice to protect public health & the environment. Examples include discovering additional asbestos-containing material during a renovation or demolition for which an asbestos inspection was conducted (e.g. within a wall cavity or plumbing chase); a public health threat exists or will develop (e.g. clean up following a fiber release episode), or unforeseeable circumstance (e.g. boiler & associated piping/valves failure).

Detailed Explanation The building was involved in a fire and is structurally unsafe. The city wants the building torn down as soon as the asbestos has been removed.

BUILDING PERMIT INSPECTION PROCEDURES

Please call 874-8703 or 874-8693 (ONLY)

to schedule your inspections as agreed upon
Permits expire in 6 months, if the project is not started or ceases for 6 months.

The Owner or their designee is required to notify the inspections office for the following inspections and provide adequate notice. Notice must be called in 48-72 hours in advance in order to schedule an inspection:

By initializing at each inspection time, you are agreeing that you understand the inspection procedure and additional fees from a "Stop Work Order" and "Stop Work Order Release" will be incurred if the procedure is not followed as stated below.

A Pre-construction Meeting will take place upon receipt of your building permit.

 X Final inspection required at completion of work.

Certificate of Occupancy is not required for certain projects. Your inspector can advise you if your project requires a Certificate of Occupancy. All projects DO require a final inspection.

If any of the inspections do not occur, the project cannot go on to the next phase, REGARDLESS OF THE NOTICE OR CIRCUMSTANCES.

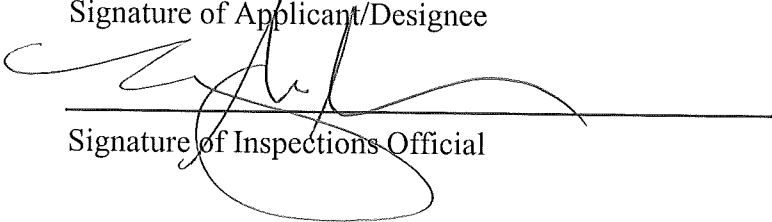

CERIFICATE OF OCCUPANICES MUST BE ISSUED AND PAID FOR, BEFORE THE SPACE MAY BE OCCUPIED.
