15 Bartol Island Road
Freeport, Maine 04032

April 1, 2016

Dear Robert,

We are pleased to present for your review the following equipment for installation at: **179 Pleasant Avenue, Portland**

Installation of the Fujitsu model, 15RLS3H, EXTRA LOW TEMPERATURE single zone mini split ductless air condition/heat pump in the second floor of the barn. We will include electrical, 220v 20A circuit, from the new sub panel (installed in the barn) to the outside unit. We will install an outside disconnect switch with connections to the outside unit and a 120v service outlet, now required by code. We will provide the refrigerant line set, communication wire and condensate drain from the inside wall mounted unit to the outside unit that will be encased in a protective cover. The inside unit will include a programmable remote control.

The inside unit will be wall mounted on the gable end of the barn, same side as the current stairs are located. The outside unit will be mounted to the side of the barn, same gable end, with a wall bracket. We will include a weather cap to protect the outside unit.

THIS UNIT MAY QUALIFY FOR A (\$500.00) EFFICIENCY MAINE ENERGY REBATE*

Your new unit will have 5 year parts and 7 year compressor warranty from Fujitsu as well as a full 12 month parts and labor warranty from Charlie Burnham Heating Service Inc., Charlie Burnham Heating offers 24 hour service 7 days a week.

*Rebates are issued by Efficiency Maine
