Hi Jeanie,

I also just left you a voice message just in case. Yes, you understood my description correctly. The adjoining unit wall, and all partitions in the unit with the dwelling above will have 5/8 type X drywall over the top plate to form a continuous ceiling membrane.

thank you.

John

Hi John,

Just to be clear, what do you mean by congruently on all adjoining walls and ceiling? For example, will not only the adjoining unit wall, but, all partitions in the unit with the dwelling above have 5/8 type X drywall over the top plate to form a continuous ceiling membrane?

Do I understand your description correctly? Short of revising the diagram of the head of wall, this needs to be clear in order to approve it.

Thanks, and feel free to call if you prefer to discuss.

Jeanie

Hi Jeanie,

We've decided we will run type X drywall congruently on all adjoining walls and ceiling for the fire separation required in the code. is that something I need to add to the files or can you do that for me on the permitting paperwork.

Again, Thanks for your help with this.
