Doug,

Below and attached is the last detailing information that was shared with the School.

- Post should be PT 6X6
- Joists: PT 2X12 @ 16"oc - max span 12' with 3' cantilever Center Beam: (4) PT2X12 - max span 8' with 3' cantilever Edge Beam: (3) PT2X12 - max span 9' with 3' cantilever
- Any portion of joists in contact with grade would be wrapped in a self-adhering membrane similar to CCW 705 (40-mil-thick min).

Let me know if I can help move this along.

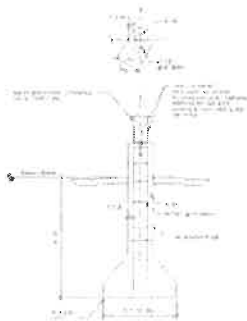

Mike
