Dear Mr. Hoffses,

I have enclosed a drawing of the foundation for the porch enclosure on my deck. The sonar tubes are 8" and four feet deep, the joist is made of two 2"x6"x12' pressure treated boards, and the new wall is placed directly over the new support beam per our conversation in June. Please note that the drawing is not to scale. If any more information is needed, please call me as soon as possible. Thank you.

Sincerely,

Ernest P. King Jr.
