

New Sizes Available

Greenstar Condensing Boiler

Efficient, Affordable, Home Comfort

High efficiency wall hung Greenstar and Greenstar Combi models available in sizes from 57 to 151 MBH inputs.

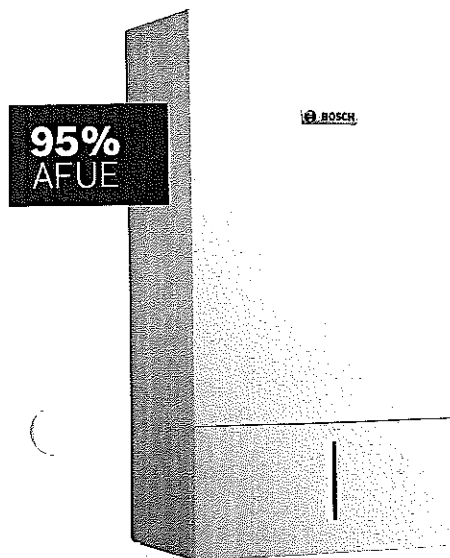

BOSCH
Invented for life

Upgrade to the latest, affordable heating technology.

The Greenstar boiler by Bosch is small in size but big in features. It is ultra quiet, space saving, environmentally friendly, uses modern condensing technology, and offers a superior industry warranty. All at a great price!

But more importantly it will keep your home warm and comfortable. The Greenstar is available in two models—combi for space and tankless water heating or the space heating model which can be used with our DHW tanks. The Greenstar is Bosch quality and innovation at its finest.

Features

- ▶ Wall mounted—no floor space required
- ▶ Easy to install—hydronic manifold and integral pump make installation quick and easy
- ▶ Fully modulating fan with 5 to 1 turndown for optimal combustion efficiency
- ▶ Combi models provide space heating & tankless DHW flow rate up to 4 GPM
- ▶ Superior warranty—limited lifetime heat exchanger and 5-year parts & labor⁵

⁵ Copies of original warranties in their entirety are available at www.boschheatingandcooling.com
