

GRK fasteners in Ledger
24" apart

This is a 3D architectural rendering of a window ledge assembly. The ledge is a long, narrow horizontal beam with a series of circular holes spaced evenly along its length. Above the ledge is a window frame with two panes. The ledge is supported by a vertical post. The text 'GRK fasteners in Ledger' and '24" apart' is positioned in the center of the ledge, with a line pointing to one of the holes. The ledge is shown in a perspective view, with the top surface and the side of the holes visible.
