Subject: Fire Alarm System Review for 161 Armory Building 772 Stevens Ave, Portland Maine

I performed a review of the fire alarm system design drawings for the University of New England Armory Building at 772 Stevens Ave, Portland Maine. The submittal package included the floor plans, riser diagram, battery calculations, and cut sheets.

I found that the revision, dated August 5, 2016, of the fire alarm system design to be code compliant and adequately support the fire detection, alarm and notification requirements of this facility.
