

provides an attractive, safe, no-rust option to complement your pool design and surrounding landscape. We offer a variety of pool fence styles specifically designed to meet swimming pool enclosure codes without sacrificing strength. Our most popular styles are the Covered Picket (CP) Designs.

Covered Picket (CP) Designs

Our Covered Picket styles feature smooth top rails that makes them perfect around pools. This safety feature, along with an aluminum construction guaranteed to never rust, makes them our most popular pool fence designs. With a variety of options, the Covered Picket Designs suit modern as well as traditional tastes, and are available with pointed pickets or finials below the top rail.

Jerith Fences Meet Most Building Codes for Swimming Pool Enclosures

Our fences are designed with specific spacing, styles, and heights to meet most swimming pool fence enclosure codes nationwide. The following styles all have less than 4" between pickets and 45" between two of the rails, or less than 1 3/4" between pickets with any rail spacing:

48" tall - CP-6, SP-1 to SP-3, Patriot 6 gauge

54" tall - CP-4, CP-5

57" tall - EP-5, EP-6 (and EP-4 when modified so pickets don't extend below bottom rail)

60" tall - CP-1 to CP-5, EP-5, EP-6, SP-1 to SP-3, Patriot 6 gauge

72" tall - CP-1 to CP-5, EP-1 to EP-6, SP-1 to SP-3, Patriot 6 gauge

Pool Fence Specifications

For architects and specifiers looking for detailed pool fence specifications, we offer a variety of  showing our fence sections and gates, as well as specifications for all Jerith products.
