Hello,

The total cost of work included on the foundation only permit application is the full cost of the foundations and the full cost of the site work only. The rest of the project costs will be submitted with the respective permit application. In other words, the mechanical, electrical, plumbing, and fire protection costs will be included on each individual permit application, and the balance of the projects costs (masonry, steel, flatwork concrete, finishes, etc.) will be submitted with the full building permit application.

Please let me know if you have any other questions.

Thanks,  
Andrew

Andrew,

*Is the "Cost of Work" amount (\$1,694,312) the total cost of construction or the amount for the foundation and related foundation sitework only for which you are applying for? If it is the total cost of construction, please supply me with the foundation only amount. Thanks!*

Hello,

Please see attached for the structural drawings related to the Park Danforth foundations only building permit application. The civil drawings were just sent in a separate e-mail. This is the final e-mail relating to the Park Danforth foundations only building application.

Please let me know if you have any questions.

Thanks,  
Andrew
