RE: HVAC Support, Pepsi Canco Road

Dear David,

Associated Design Partners, Inc. has visited the above referenced building in order to review and document the existing roof framing conditions of the 1967 building addition. This was done in order to determine if the existing roof framing is acceptable for carrying the additional load of a proposed rooftop cooling unit.

Based upon the original design drawing of the building addition dated February 8, 1967 by Alonzo J. Harriman Associates, Inc. the existing 10B4 steel purlins spaced at 48" on-center are acceptable to support the proposed load of single rooftop cooling unit Trane model TCC018, at any location along its length. See attached support frame plan and detail for additional information.

Please call should you have any additional questions.

Sincerely,

Aaron S. Wilson, P.E.  
Structural Engineer
